

HARITH BENNET

Software Engineer | Data Engineering | Cloud & Full-Stack Systems
Selangor, Malaysia | 012-781 8524 | harith.bennett@gmail.com | linkedin.com/in/harith-bennet

PROFESSIONAL SUMMARY

Software Engineering graduate from Universiti Teknologi Malaysia (CGPA 3.80/4.00) and Yayasan TM scholar with hands-on experience across data engineering, cloud-native pipelines, full-stack development, AI/LLM automation, mobile engineering, and startup product leadership. Built and supported production systems using AWS, Python, PySpark, QuickSight, Next.js, TypeScript, PostgreSQL, and modern cloud infrastructure, with experience translating business requirements into working products and integrations.

PROFESSIONAL EXPERIENCE

Full Stack Engineer / Data Engineer | Asterisk Digital Sdn. Bhd.

Feb 2026 - Jul 2026

- Build and maintain cloud-based data workflows using Python, PySpark and AWS Glue for analytics and reporting workloads.
- Reverse-engineered and debugged legacy data pipelines supporting 1,000+ locations across ingestion, transformation and downstream analytics flows.
- Built 5+ AWS data pipelines using Glue, Step Functions, EventBridge, S3 and Boto3, applying layered data architecture patterns.
- Develop Amazon QuickSight datasets and dashboards, troubleshoot production pipeline issues, and improve data reliability for analytics use cases.
- Standardized local AWS Glue development using Docker and AWS CLI, and contribute to ETL design, implementation and operational debugging.

Co-Founder & CEO | Daganoss Sdn. Bhd. (DagangNow)

Jan 2026 - Present

- Co-founded and led development of DagangNow, a Malaysian commerce platform combining merchant storefronts, orders, payments, logistics, affiliate workflows and AI-assisted sales.
- Architected the production stack with Next.js 15, TypeScript, Drizzle ORM, PostgreSQL/Neon, Render, Cloudflare R2 and event-driven/background workflows.
- Integrated payment gateways, courier and logistics providers, and WhatsApp Cloud API; designed shipping, payout, authentication and multi-tenant commerce flows.
- Lead product strategy, technical delivery, demos and client discussions across engineering and commercial workstreams.
- Built an AI-assisted lead generation and follow-up system using LLMs, Treg and JEV to discover and enrich prospects, prioritize leads, and automate personalized outreach workflows.

Engineer Intern | Asterisk Digital Sdn. Bhd.

Aug 2025 - Feb 2026

- Built mobile application features with React Native, Expo and TypeScript using TanStack Query, React Hook Form and Zustand.
- Reverse-engineered undocumented API and web behaviour through network inspection and backend code analysis to implement reliable integrations.
- Contributed to full-stack feature delivery and technical troubleshooting across mobile and web application workflows.

IT Assistant Intern | EcoPrasinos Engineering Sdn. Bhd.

Jul 2022 - Sep 2022

- Supported internal IT operations and SharePoint environments using SharePoint Designer and SharePoint Server, including day-to-day troubleshooting and user support.

EDUCATION

Bachelor of Software Engineering (Hons.) | Universiti Teknologi Malaysia

2022 - 2026

CGPA: 3.80/4.00 | Yayasan Telekom Malaysia Scholar (2023 - 2026)

Foundation in Physical Sciences | Universiti Teknologi Malaysia

2021 - 2022

TECHNICAL SKILLS

Languages: TypeScript/JavaScript, Python, Go, SQL

Frontend & Mobile: Next.js, React, React Native, Expo

Data & AWS: AWS Glue, Step Functions, EventBridge, S3, Lambda, Spark/PySpark, Boto3, Amazon QuickSight

Backend & Databases: Node.js, PostgreSQL, Neon, Drizzle ORM, REST APIs, webhooks

Cloud & DevOps: AWS, Docker, Cloudflare, Render, Vercel, Git, CI/CD

AI & Automation: LLM APIs, prompt engineering, RAG, agentic workflows, OpenAI/OpenRouter, Treg, JEV

Systems & Integrations: Payment gateways, logistics APIs, WhatsApp Cloud API, AI sales agents, multi-tenant architecture

CERTIFICATIONS

- Building RAG Apps Using MongoDB - MongoDB, Jul 2025
- Fundamentals of Cloud Computing - RunCloud Education, Jul 2025
